1. Summary and goals

A cartoon tower defense game set in medieval India. Players build Archer Towers, Barracks, Mage Towers and Cannons along winding roads, lead the Sun Knight and cast spells to stop bandits, barbarians and bosses. The story is a journey through six regions and seasons of India. Version 1.0 ships Region 1: a tutorial and 5 levels (the 5th a boss), three game modes and the full meta game. Regions 2 to 6 come as free updates; their enemy art is already drawn.

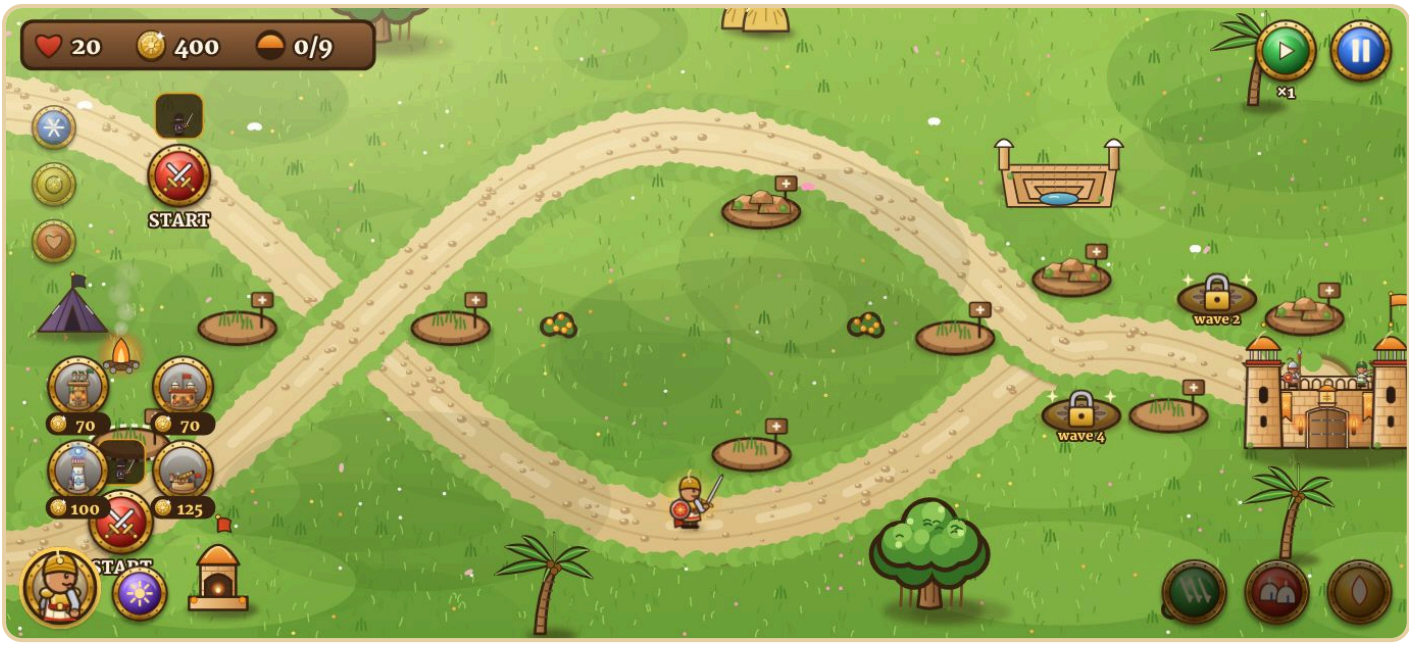

GOAL	MEASURE (FIRST 90 DAYS)
Players enjoy it and come back	Day-1 retention ≥ 35%, day-7 ≥ 12%, Play rating ≥ 4.3
Fair, healthy money	ARPDAU ≥ $0.03, ≥ 1.5% of players buy something, ≤ 1 interstitial per 3 minutes
Stable on every phone	Crash-free users ≥ 99.5%, Android 7 (API 24) and up

Players: casual and mid-core mobile players aged 13 to 35, India first, then worldwide. Sessions of 3 to 6 minutes. The tone is easy to read and a little cheeky, with short story lines Gen Z gets at once.

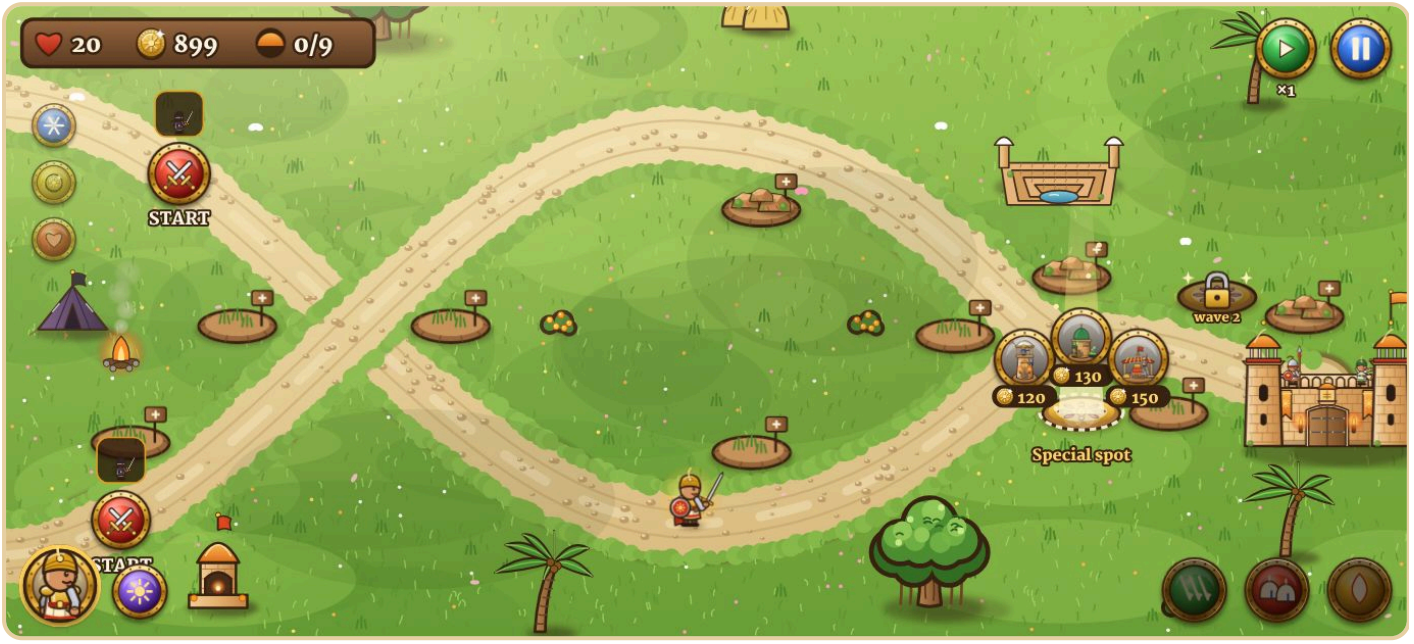

2. Game modes

MODE	UNLOCKS	WHAT IT IS	REWARDS
Story	From the start (tutorial on first launch)	Levels in order on the world map; 1 to 3 diyas per level	Coins; diyas unlock Forge ranks
Challenges	Each level's 3 challenges unlock when you complete that level	The same map with a rule: one tower type, no spells, no hero, few lives	**Rubies only**, once each
Endless	Beat the region boss	Waves never stop and grow harder; a boss returns every 10th wave	Coins per wave; leaderboards

3. Core gameplay

Build menu on a standard spot

Special spot: only special towers

New enemy card

Victory

Defeat, with the revive offer

- **Roads grow more complex:** one winding road early on (a hairpin, then a road that crosses itself), then a crossroads with two entrances, an X crossing, and finally three entrances with a bandit portal.
- **Entrance markers** show where the next wave comes from and who is coming; tap one to call the wave early for bonus gold.
- **Three kinds of build spot:** standard; rubble cleared with battle gold; and special spots that open one by one during the battle (or earlier for gold) and take only special towers. Levels have 1 to 3 special spots (a design rule, not shown to players).
- **Towers** have three tiers that look clearly different; **special towers** have 8 levels and up to 3 are taken into each battle.
- **Hero:** the Sun Knight (300 hp). Tap him, then tap the road to move him. **Sun Strike**: 70 magic damage and a 1.4s stun around him, every 18s.

Spells

SPELL	COOLDOWN	EFFECT
Arrow Rain	32s	4 volleys of 10 damage in a 40 radius
Reinforcements	24s	2 soldiers for 18s
Holy Fire	42s	30 magic damage, burn 10/s for 4s, stun 1s

Power-ups (one of each per level)

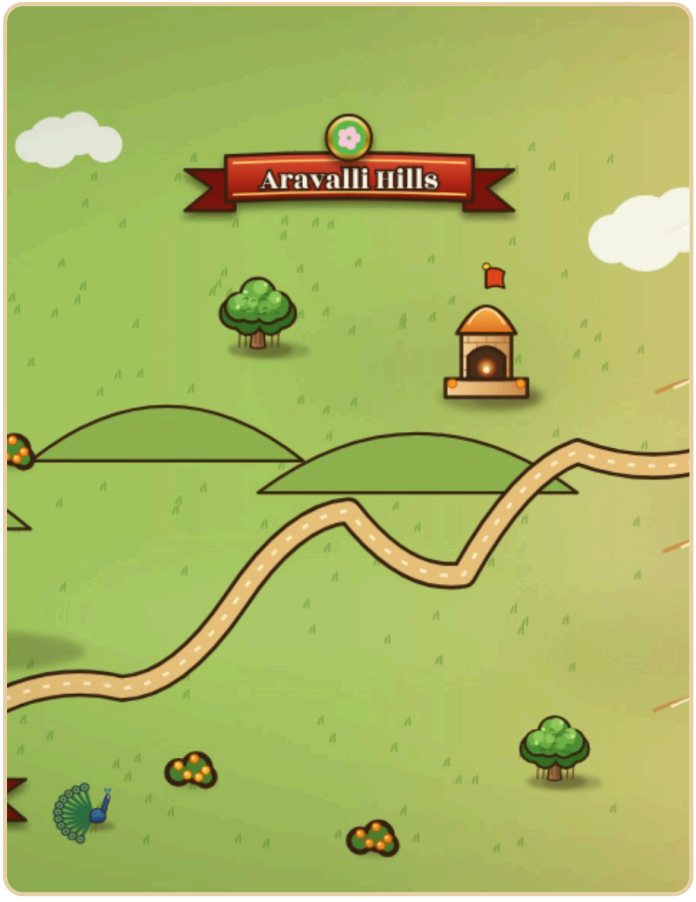

POWER-UP	EFFECT	PRICE
Freeze Bomb	Freezes every enemy for 5 seconds	150 coins or 10 rubies
Gold Boost	+120 battle gold right now	120 coins or 8 rubies
Extra Lives	+5 lives for the fort	180 coins or 12 rubies

4. The world: six regions, six seasons

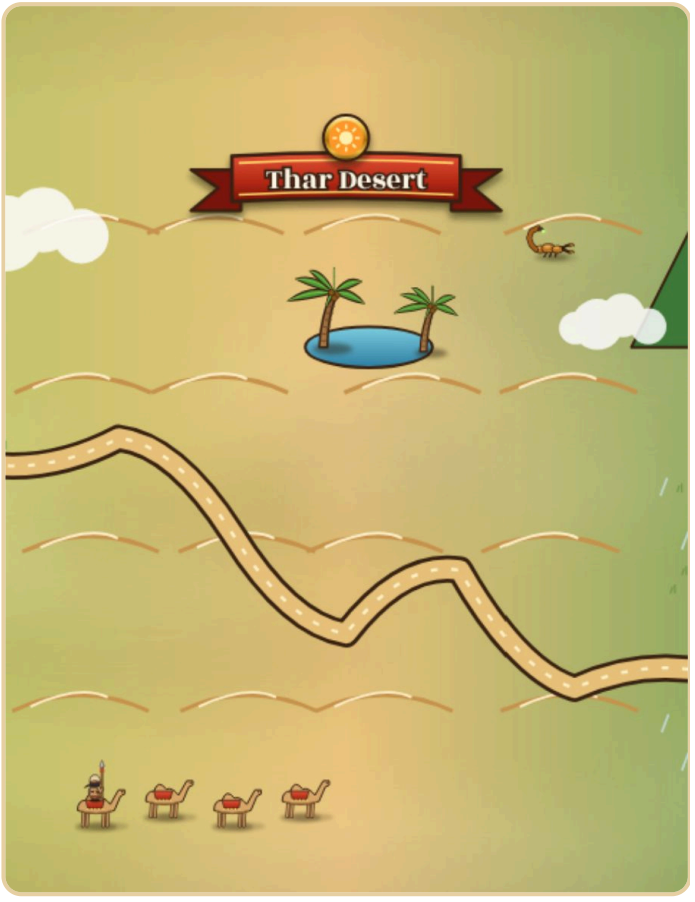

The world map is a side-scrolling journey from the capital, Suryagarh, through six regions of India, each in its own season. Every 5th level is a boss.

Tutorial steps

1. Tap a build spot and choose the Archer Tower.
2. Ready! Tap the swords to call the first wave of bandits.

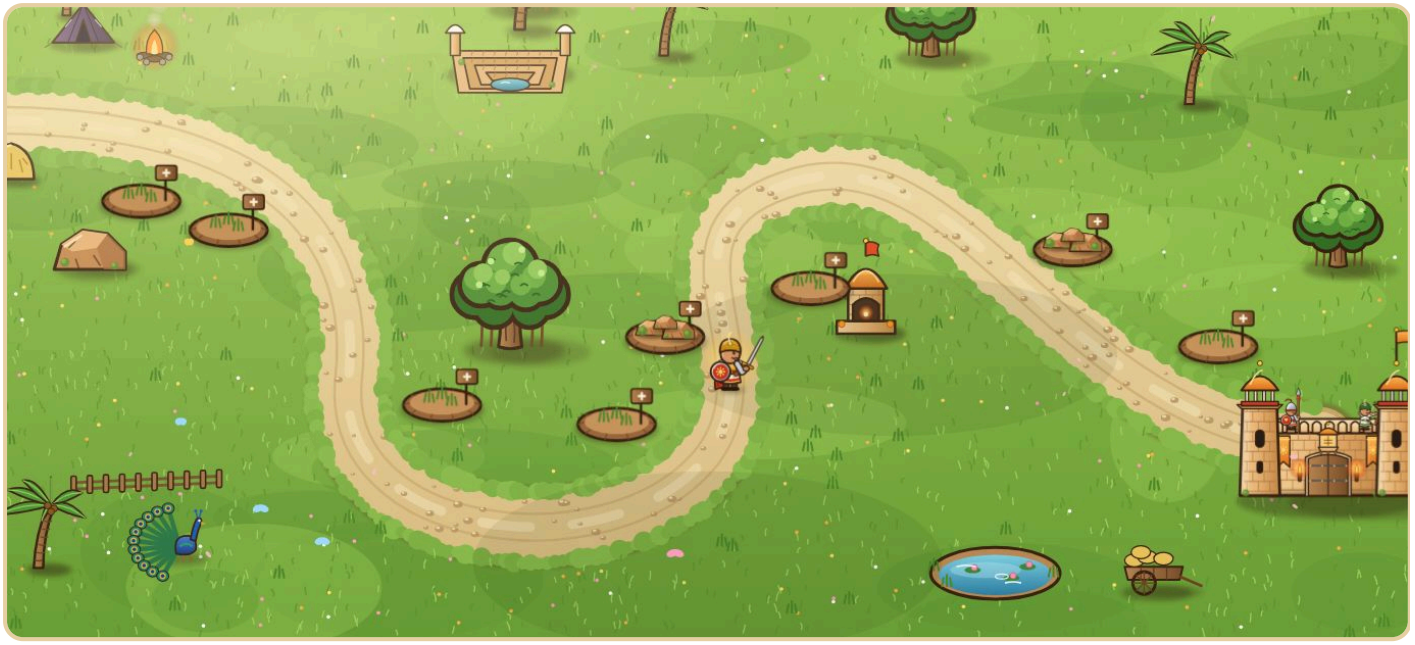

3. Tap your tower and upgrade it to Marksmen.
4. Rubble blocks the spot by the fort. Tap it and pay gold to clear it.
5. Build Barracks there: soldiers block the road.
6. Call waves early with the swords to earn bonus gold.

LEVEL 1 · ARAVALLI HILLS · SPRING

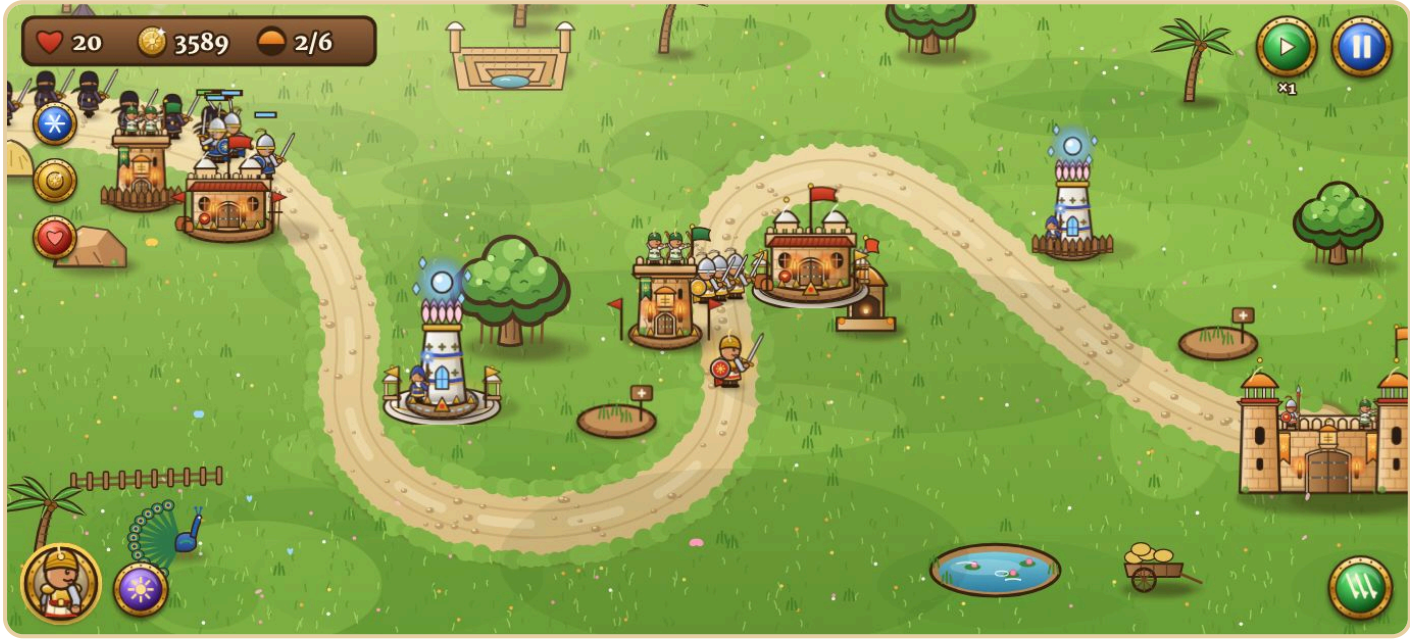

Village at the Pass

> Bandits just raided the village market and ran off with the festival lamps. The whole village is counting on you. Time to lock in.

Start gold 230 | Lives 20 | Enemy health ×1.00 | 6 waves | one road | Spells: Arrow Rain | Hero: Sun Knight

8. Towers and buildings

Each tower tier looks clearly different: a small outpost behind a wooden palisade, a taller stone tower with gold studs and pennants, then a grand tower on a marble plinth with domed pavilions, banners and a crest. Building plays a rise-from-the-ground effect; upgrading plays a pillar of golden light and "UPGRADED!".

Ads (AdMob), with player-friendly rules in code

- **Rewarded, always optional:** double a win's coins, revive once (+5 lives), try a special tower for one battle, −15 minutes on a Forge job, the free ruby chest (5 rubies, 3 a day). At most 12 a day.
- **Interstitial:** only between levels, never before level 4, never after a loss, at most every 3 minutes, never with Remove Ads.

- **Banner:** small, top centre, only on the world map after 3 wins.
- **Consent:** Google's UMP form where the law needs it; ads limited to Teen content.

12. Daily reward, quests, Royal Forge, achievements

Daily reward (pops up on the main menu once a day until claimed)

DAY	REWARD
1	100 coins
2	5 rubies
3	200 coins + Gold Boost
4	10 rubies
5	300 coins + Freeze Bomb
6	15 rubies
7	600 coins + 30 rubies + Freeze Bomb, Gold Boost, Extra Lives + **royal chest**

Signed-in players get +20%. Missing a day restarts the calendar; moving the phone clock back gives nothing.

Daily quests (3 a day, rubies only, +15 bonus for all three)

Examples: Defeat 60 Bandits · Defeat 150 enemies · Win 2 levels · Earn 3 diyas on a level · Win using only Archer Towers · Cast 8 spells · Call 5 waves early · Upgrade 2 towers to the top tier · Build 15 towers.

Royal Forge: upgrades that take real time

TRACK	BONUS PER RANK
Archer Training	+7% Archer damage per rank
Barracks Drill	+10% soldier health per rank
Arcane Study	+7% Mage damage per rank
Gunpowder	+7% Cannon damage per rank
Royal Engineers	+7% special tower power per rank
Royal Armoury	+8% hero health and damage per rank

13. Audio and feel

All music and sound are synthesised in code, so there is nothing to license. The music uses raga Bhupali with a tanpura drone, a bansuri-like flute and tabla, and it follows the battle: calm before the first wave, faster while fighting, a war-horn drone and pounding dhol when the fort is in danger or on the final wave, a shehnai-like lead for the boss, and a heartbeat at low lives. Birdsong and wind fill the hills; each wave starts with a war horn and battle cries. Every tower and event has its own sound.

Feel: walk and attack animation for every unit, hit flashes, enemies falling, cannon recoil, archers loosing, a golden pillar on upgrades, shields, war-drum rings, poison, portals, slow motion for the boss entrance and the final kill, and a red pulse when the fort is in danger.

14. Devices, tech and privacy

- Plain JavaScript on an HTML canvas, wrapped with Capacitor 8 for Android (Android 7 and up). AdMob, Google Play Billing and a native Google Play Games plugin (sign-in, achievements, leaderboards, cloud save, review).
- The battlefield (844 × 390) scales without stretching; wider screens see more scenery. The HUD scales 0.74–1.25 and is pinned to the safe area.
- Every build runs the rule tests and a bot that must win every level and challenge, then checks every screen on 7 phone and tablet shapes, then builds the APK and AAB.
- Privacy policy, terms, age rating, `ads.txt` and `app-ads.txt` live on the website branch; in-game Delete my data, Ad privacy choices and Restore purchases.

15. Roadmap and risks

VERSION	CONTENTS
1.0	Region 1 (tutorial + 5 levels, 8 enemy types and a boss), Story, 15 Challenges, Endless, 4 special towers (8 levels), Royal Forge, full meta game, ads, purchases, Play Games
1.1	Region 2: Thar Desert, sandstorms, the Dune Colossus
1.2	Region 3: Western Ghats, monsoon and river paths, the Storm Serpent
1.3–1.5	Regions 4 to 6 and the Shadow Emperor finale; more heroes; boss cutscenes; translations (Hindi first)

RISK	MITIGATION
Too hard or too easy	The bot plays every level and challenge on every build; tuning by data later
Ad revenue below plan	Rewarded ads first; add mediation after launch
Store policy rejection	No loot boxes, clear ad rules, complete data-safety answers
Low-end phones stutter	Art pre-rendered once to bitmaps; battery saver (30 fps)

This document is generated by `node game/tools/prd-doc.mjs` from the game itself, so every picture and number matches the current build.
